The Swift programme helps SMBs develop an end-to-end migration strategy with the greatest opportunities for success.

powered by aws

Preparation & Planning

Business Case

- Benefits Assessment
- High-level TCO goal analysis
- Steering group formation/advice

2 day, 5 day or 10 day programme

"Out of all the consultancies we engaged, nubeGo provided us with the most complete business case for moving to AWS including a proposed architecture and high-level cost model"

Founder, Start-up Search Platform

Rapid Discovery

- AWS Application Discovery Agent + Stakeholder Interviews + Cloud Readiness Assessment
- 7Rs Workload Classification
- Migration Portfolio Assessment (MPA)

2, 5 or 10 day discovery workshops

"During the planning phase of our project, nubeGo's Solution Architect worked closely with us to understand our existing tech stack and apply their own experiences to recommend alternative approaches"

Software Manager, Healthcare ML Platform

nubeGo

Refined Migration Plan

- Data-driven migration plan using Data Migration Hub data & reports
- Building-block planning
- Lighthouse project identification

2, 5 or 10 day planning packages

"Although we wanted to attack this in an agile manner, we asked nubeGo to help us understand an indicative size for the entire programme and a recommendation for how to break it down"

MD, Financial Analytics Website

Execution & Validation

Small Module 15 days	**Medium Module** 30 days
Large Module Upto 90 days	**XL Module** 180 days

nubeGo assists with the rapid re-hosting of servers and data stored into AWS using AWS **CloudEndure** and the **AWS Database Migration Service.** Our Solutions Architects create data-driven designs for network and application infrastructure.

nubeGo's technical architects, cloud developers and platform engineers are available in pre-sized modules of work to **re-architect** your primary platforms, build **CI/CD** and automated test frameworks and to help to shape your Cloud operating model.

During discovery we can help to size the migration project needs to match one of our consultancy modules

---

Swift Cloud Operations

Project Management & Agile Delivery: Migration is an opportunity for change. Experienced consultants lead and coach in lasting agile practices.

NCMS (Cloud Managed Service): AWS Landing Zone best practices applied in hours, not weeks. 24/7 access to Cloud support for one monthly cost.

CI/CD and DevOps Tooling: apply robust DevOps practices from day-one. Deployment tooling is considered in all nubeGo migration plans as standard.

Automated Monitoring, Alerting and Patching: one nubeGo client cites a reduction in operational effort of 86%, to just 2 hours a month.

Real-Time Cost & Security Monitoring Add-Ons: partnerships with Panther and CloudHealth allow nubeGo to auto-deploy 3rd-party monitoring.

Operating Model, Policy & Process Definition: experience reviewing & building company-wide Cloud Operating Models and SDLC at SME and Enterprise scale.
